

GTimeLog

Marius Gedminas
<marius@pov.lt>

Programmers of Vilnius
<http://pov.lt/>

EuroPython 2007

A simple tool to keep track of
time

Written in Python with pygtk

Optimized to not get in my way

(demo)

It's not finished

No user interface for
configuration

you get to edit a text file

Doesn't get your favourite
editor/mailer from your desktop
preferences

Reporting interface could be
better

If you're interested, find me
I'll stay around for the sprints

Or send me patches

(and I'll ignore them for a long time)

URL? Just Google "gtimelog"

<http://mg.pov.it/gtimelog/>
